

62-5

### Product features

The GasIQ 65-2 is a robust and durable hand-held cutting torch designed for use with propane and oxygen. It's specially adapted for demanding scrap cutting applications and meets EN ISO 5172 standards.

GasIQ 62-5 is a reliable and efficient solution for demanding cutting applications.

- **Powerful design:** Designed to efficiently heat metals to their ignition temperatures using low pressure alternative gases.
- **Triangular tube design:** Provides stable and powerful cutting with a solid cast head that can handle material up to 300mm.
- **Soldered connections:** Improves durability and reliability.
- **Flat seats:** Reduces the risk of damage to the tip during use.

### Technical data

|           |                   |
|-----------|-------------------|
| Type      | Cutting torch     |
| Principle | Injector          |
| Standard  | ISO 5172          |
| Fuel gas  | AC / Propane(LPG) |

### **Materials:**

|                |                           |
|----------------|---------------------------|
| Front piece    | CW 617N                   |
| Back piece     | CW 617N                   |
| Handle         | CW 508L                   |
| Tube           | AISI304L                  |
| O-rings        | Buna N, (N674-70)         |
| Shut-off valve | CW 614N / Stainless steel |
