

Optimator II

Product features

The Optimator from GasIQ offers enhanced efficiency, quality and sustainability for welding applications with long-term profitability and environmental consideration.

- **Two-stage system:** The Optimator from GasIQ is the original two-stage system ensuring precise control of gas flow for welding applications.
- **Efficient gas usage:** The Optimator's second stage effectively reduces the gas surge during the initial welding moment, resulting in gas savings up to 54%.
- **Improved welding quality:** Reduced gas surge leads to improved welding quality by minimizing porosity in the welds.
- **Quick return in investment:** Estimated ROI in 6 months, making investment economically advantageous.
- **Environmentally friendly:** Environmentally friendly by reducing gas transportation, contributing to sustainable development.
- **Lockable option** Also available as a lockable option with a robust lock for extra security and protection.

Technical data

Type	2-stage / cylinder
Regulator class	0
Standard	ISO 2503
First stage calibrated at	5 bar
Gas	Ar/mix / Ar/H ₂
Temperature range	-20°C to +60°C

Pressure / Flow

Inlet pressure P ₁	200 / 300 bar
Outlet pressure	Depending on flow 0,2-1 bar
Q _n	0-5L / 0-20L / 0-34L/min

Materials:

Valve body	CW 614N
Valve seat	Kel-F
Diaphragm	NBR
Valve cap	Aluminum EN 6026
Hand wheel	ZINK, ZP0410
Flow tube	Grilamid TR90°

Connections:

Inlet	See page 2
Outlet	See page 2

Dimensions
